

# CLINICAL DATA ANALYSIS IN R

## PHASE I - INTRODUCTORY TRAINING

*A Five-Session Evening Course for*

Doctors • Nurses • Medical Researchers • Allied Health Professionals

### SCAN TO REGISTER

Easy. Quick. Secure.  
**Register Today!**

### COURSE AT A GLANCE

**5**

Sessions total

**TUESDAY**

Every Tuesday

8 September - 6 October 2026

**8:00 PM**

Session start

**90 min**

Per session

### WHY THIS COURSE?

Many healthcare professionals collect valuable clinical data but lack the tools to analyse it properly. This course builds practical, foundational skills in:

- ✓ Data analysis in R
- ✓ Basic biostatistics
- ✓ Common medical statistical tests
- ✓ Creating publication-ready tables and graphs

No prior programming experience required.

### WHO SHOULD APPLY?

- Medical Doctors and Residents
- Nurses
- Clinical Researchers
- Clinical / Hospital Pharmacists
- Public Health Professionals
- Hospital Staff Involved in Research
- Masters and PhD Students

### WHAT YOU WILL LEARN

**DAY 1**

Introduction to R & RStudio

**DAY 2**

Understanding & Cleaning Clinical Data

**DAY 3**

Descriptive Statistics, Tables & Figures

**DAY 4**

Common Medical Statistical Tests  
t-test • Chi-square • Non-parametric

**DAY 5**

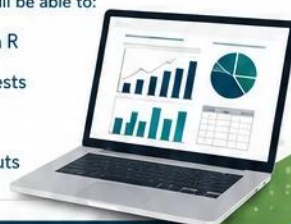

Introduction to Regression & Interpreting Output

### COURSE OUTCOME

By the end of the course, participants will be able to:

- ✓ Analyse their own clinical data in R
- ✓ Choose appropriate statistical tests
- ✓ Interpret results correctly
- ✓ Produce publication-ready outputs
