

Trainers: Vương Mỹ Lượng (Senior Biostatistician, lead trainer) & Bernard Osang'ir (Senior Biostatistician) · Every Tuesday 20:00 · 8 September – 6 October 2026

Folder map — what's where

Course_Preparation/	The pre-course pack — participants START HERE, about one week before training.
Course/	The main 5-session course used during the live sessions (scripts, practicals, solutions, handbook, instructor manual).
Deck_and_Build/	The slide decks (English + Vietnamese) and the tools that build them — for trainers.
README.md / README_VN.md	One-page course overview (English / Vietnamese).
unpacked/	The Neudata PowerPoint template used by the deck builder.

Inside **Course_Preparation/** follow the numbers in order: **00** → **01** → **02** → **03** → **04** → **05** → **06** → **07**, plus Data, Exercises, Solutions, Cheat_Sheets, Guides, and the .Rproj project.

Where to find the details

- **How to install & study:** Course_Preparation/00_READ_ME_FIRST/Study_Guide_EN.pdf (and _VN).
- **Teaching notes, timing, expected results:** Course/Instructor_Notes/instructor_manual.md.
- **Participant reference:** Course/References/participant_handbook.md.
- **Dataset + deliberate data-quality problems:** Course_Preparation/Data/.
- **Slides (English + Vietnamese):** Deck_and_Build/Slides/.
- **Vietnamese:** every document has a matching _VN file, plus a Vietnamese slide deck.

How to advise participants before the training

1. Send the **Course_Preparation** folder about **one week** before the course.
2. Ask them to open 00_READ_ME_FIRST/Study_Guide (English or Vietnamese) and follow it top to bottom.
3. Install **R** → **RStudio** → **the packages**, then run installation_test.R (it prints the success message).
4. Double-click Clinical_Data_Analysis_PreCourse.Rproj, then work lessons **03** → **07** (08 optional).
5. Try the **Exercises**, check the **Solutions**. About **2–3 hours total**, spread over the week — nothing is graded.
6. Support: myluong.1710@gmail.com.

READY WHEN... R and RStudio are installed, installation_test.R passes, the .Rproj opens, and they have run a few lines of code. It is fine to arrive with setup half-working — there is help on the first evening.
